

Rubber Fab

a Garlock Hygienic Technologies company

Tuf-Flex® FKM Core Unitized Gaskets

Rubber Fab's Tuf-Flex® sanitary gasket is the world's **FIRST** unitized Tri-Clamp® gasket in the Food and Pharmaceutical market and is setting new standards for purity, performance and flexibility. We are pleased to add a Tuf-Flex® gasket with a FKM core to the family of products!

A Tuf-Flex® sanitary gasket's contact surface is a layer of PTFE grafted to an EPDM *or* FKM rubber inner core. This totally bonded construction provides an exceptionally pure and incredibly flexible seal.

By grafting the elastomer with a layer of PTFE, Tuf-Flex® will behave like an elastomer but will prevent product contamination, service interruptions and clean-up costs associated with traditional elastomer seals.

This new Tuf-Flex® with the FKM elastomeric core can handle temperatures up to 400°F and if there is a breach of the PTFE outer shell, the FKM will handle a wide range of chemicals that it comes in contact with. The FKM makes it more chemically resistant and a great choice for those chemical applications where an ordinary gasket won't do.

Currently, Rubber Fab is offering the Tuf-Flex® FKM core Tri-Clamp® gasket in 1/2" - 6" and will be made to order. Please be sure to keep that in mind when ordering.

SPECIFICATIONS

- PTFE contact surface
- FKM rubber core

SIZES

- 1/2" - 6"

CERTIFICATIONS

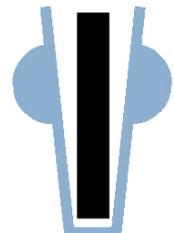

- U.S. Pharmacopeia Class VI Certification
- Cytotoxicity Criteria
- Title 21 CFR 177.2600 and 177.1550
- 3-A Certified
- USDA Sanitary Standards
- Current Good Manufacturing Practices (CGMP)
- ASME-BPE Standards
- Animal Derived Ingredient Free
